PROFILE SUMMARY

FullStack Developer with experience in building scalable web applications using the MERN stack. Skilled in both front-end and back-end development, with a focus on creating dynamic, user-friendly solutions. Passionate about continuous learning and eager to contribute to a forward-thinking company

WORK EXPERIENCE

Techorses February - Present (2025)
Full Stack Developer

- Built end-to-end web applications using the MERN stack, including a full-featured e-commerce platform. Designed scalable APIs, implemented secure user authentication, and developed responsive UIs with React.js to ensure seamless and intuitive user experiences.

V Ex Tech Solution Jan - June (2024)
Full Stack Developer Intern

- Developed a dynamic e-commerce web app using the MERN stack. Built RESTful APIs, implemented secure authentication, and crafted a responsive UI to ensure efficient frontend-backend integration.

PROJECTS

Real Time Chat Application [🔗](#)

- Developed a real-time chat application using the MERN stack, with a responsive React.js interface and secure JWT authentication. Implemented RESTful APIs for user data management and real-time messaging, integrating Socket.IO for seamless communication. Optimized MongoDB for scalable storage, ensuring a smooth and interactive user experience

Scan Application

- For university project created flutter based application that scan the barcode of the products and add products in cart for purchases.

Personal Asistant

- For university project in diploma created a basic android based personal assistant which can search using voice commands , make phone calls and open applications in mobiles.
